

# Laera Institute's Survey of Arctic, Northern, and Circumpolar Studies Programmes & Curriculum

[The Laera Institute for Circumpolar Studies](#) supports the work of UArctic in Arctic, Northern, and Circumpolar Studies. It's focus is on developing, coordinating, promoting and delivering Circumpolar Studies both locally and internationally.

The purpose of the survey is to capture a snapshot of the status and extent of Arctic, Northern and Circumpolar Studies programmes and courses, broadly defined. Please take 15 minutes to complete it if your institution offers programming in this area. It will help us to identify the core areas currently in need of ongoing or new forms of support and development toward promoting the future viability for Arctic, Northern and Circumpolar studies.

To participate in the survey go to: <https://nettskjema.no/a/curriculumsurvey#/page/1>

Please forward this survey to others at your institution who might have applicable knowledge to share.
